## Agenda, June 8, 2010

PROPOSED AGENDA for Tuesday June 8, 2010 at 7:30pm, Town Hall Annex, First Floor Conference Room

Approval of previous minutes

Bill Eykamp will share insights about Secchi Disk readings - how is it done, what does it mean, trends, seasonal fluctuations, etc

Open Discussion: Should we add a "knowledge sharing" topic to each meeting? Collectively our committee has a tremendous amount of knowledge from years of meetings, observations, and studies of Spy Pond. If we share and document this information, we could slowly build a management plan. Topics could include water quality measurements, nutrients, milfoil, phragmites, wildlife habitats, shoreline erosion and plantings, sandbar, water fluctuations, summer and winter recreation, water bodies funding, cost estimates, outreach, etc. Is this a viable idea? What topic(s) would you be interested in sharing and/or learning about in the Fall?

Herbicide treatment done on June 1st.

Phragmites Status

Letter regarding rowing program mailed to Selectsmen on May 24th

Activities for the Fall: Town Day, Splash?, Speakers?

Pick meeting dates for the Fall

Vision 2020 Year End celebration on June 15

Other/New Business
