**ROAD
CONSTRUCTION
UPDATE**

April 27, 2015

The Town of Arlington, through its Contractor, All States Material Group, is planning on installing a surface/wearing treatment course of new asphalt on your street this construction season. A Locus Map of the streets we are proposing work on as part of this project can be found on the reverse of this notice.

This work is scheduled to begin on or around May 14, 2015 and is expected to take 1-2 weeks for completion.

This project will require adjustment of the existing manholes, catch basins, and valve covers on your street prior to paving. There will be no curb or sidewalk work conducted as part of this project.

Please note there will be on-street parking restrictions established to allow for construction activities and equipment. Temporary daily detours may also be necessary to allow for the work. Police Traffic Detail will be present to assist in traffic control.

Should you have any questions feel free to contact the Project Engineer, Kurt Kelley at kpkelley@town.arlington.ma.us or 781-316-3386.

We apologize for any inconvenience, and thank you in advance for your cooperation in this project.

BID 14-20: ULTRA-THIN BONDED WEARING COURSE SURFACE TREATMENT LOCUS MAP

Map prepared by the Town of Arlington Engineering Division on 5/19/2014. Locations, dimensions, & distances are approximate in nature.
