Re: Phase # 9 Sanitary Sewer Rehabilitation Project - Warranty Retest

The Town of Arlington has initiated a program to reduce the amount of groundwater (infiltration) and rainwater (inflow) entering the sewer system. Through this program, sources of Infiltration and Inflow (I/I) will be identified and removed. When these sources are removed, the quantity of flow entering the Arlington sewer system and the risk of sewer backups and overflows will be reduced.

The Town's Contractors, Rapid Flow Inc., will be conducting sewer manhole and sewer pipe inspections as part of the Phase # 9 Sanitary Sewer Rehabilitation - Warranty Retest Project.

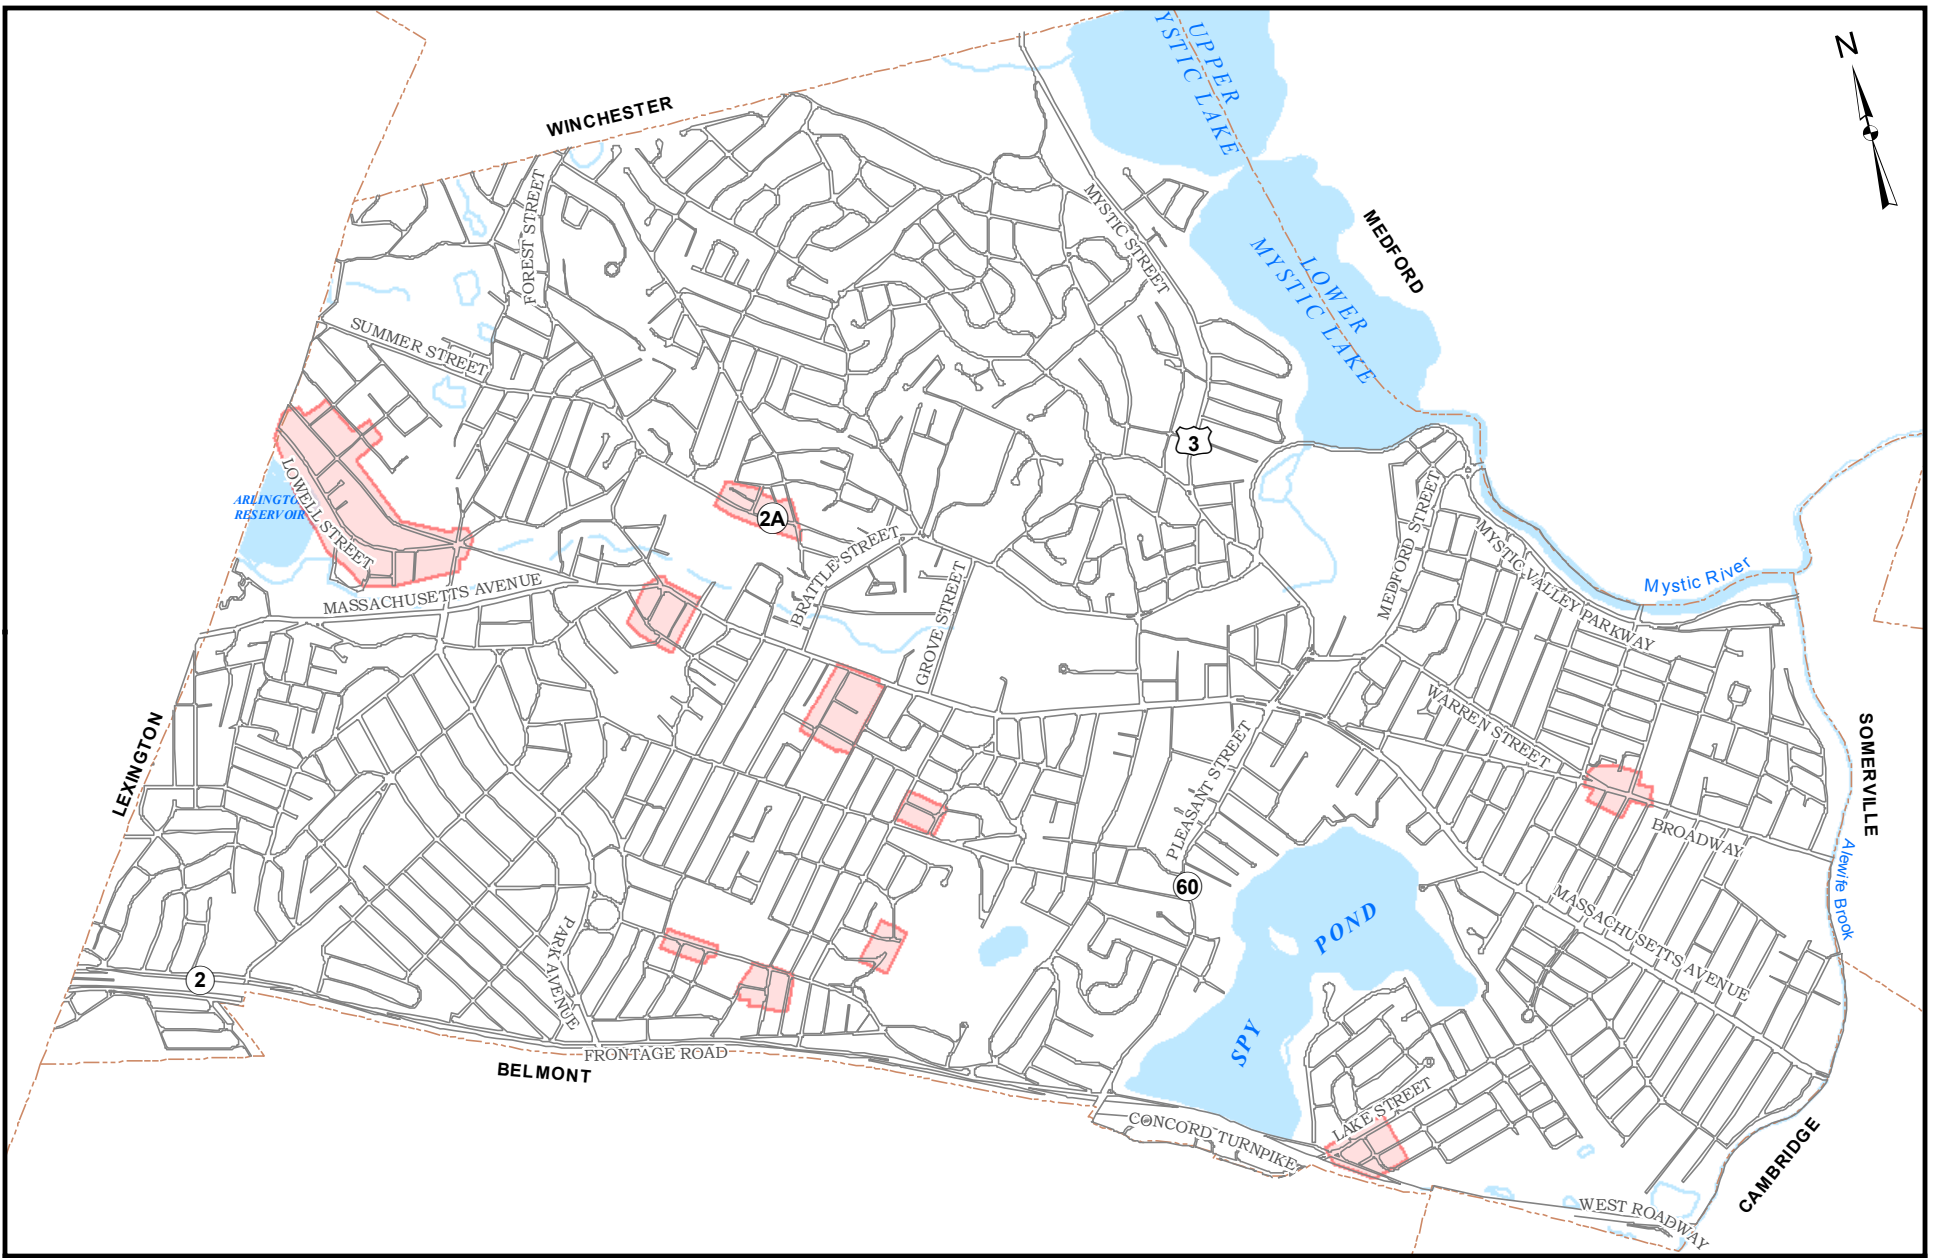

Crews will be working between March 25, 2018 and April 6, 2018. The work will be performed at night for the first week; Sunday, March 25, 2018 through Saturday, March 31, 2018, between 8:00 p.m. and 5:00 a.m. During the following week, work will be performed during normal working hours, between 7:00 a.m. and 5:00 p.m. Further notifications will be provided as the work advances.

Persons performing the work will be in clearly marked trucks and will be wearing bright shirts or vests. Work will be conducted primarily within the Town's right-of-way and private residences should not be affected.

The areas included in this project are highlighted on the attached locus map.

For further information, contact Jamie Craig (Weston & Sampson Engineers) at 978-265-5037.
