

# Arlington Board of Health Recreational Marijuana Regulations

The Board of Health will be regulating the sale of recreational marijuana to address public health and safety concerns. This will allow the Board of Health to inspect annually, conduct checks for compliance with regulations and follow up on resident concerns. The Regulations will give the Board of Health the authority to address the following:

No person under age 21 will be permitted to enter a Recreational Marijuana establishment. The Regulations will allow the department to conduct routine checks of compliance with this requirement similar to how checks are conducted at tobacco and alcohol establishments.

Marijuana Establishments will be required to develop a plan for safe and secure storage and disposal of marijuana waste.

All products will be in child proof containers, labelled *not safe for kids* and will not depict child friendly images.

Self-service displays, vending machines, and repackaged or out of package sales will be prohibited.

Applicants wishing to prepare or sell edible marijuana products must undergo the Board of Health plan review process for food establishments prior to beginning operations.
