Project Name: D/B Rehabilitation of the Percy Warner Park Allée, Nashville TN
Contract Number: N/A
Project Location: Percy Warner Park, Nashville TN
Name of Owner: Metro Nashville/Davidson County & Friends of Warner Park, Inc.

General Scope Of Construction Project:

The Tradesmen Group, Inc. was selected by the Friends of Warner Park & Metro Nashville/Davidson Co to rehabilitate the Percy Warner Allée in a design/build contract as part of an initiative to preserve, highlight and celebrate the historic stone entrance and landscape features of the Allée that was constructed in 1936 and originally designed by nationally known landscape architect Bryant Fleming. Project rehabilitation included significant scopes of work to address inadequate storm water drainage at the upper Allée, terrace level and lower Allée. Areas along Loop Rd and the bridle trail were excavated and re-graded to produce proper storm water flow to new concrete catch basins which direct water away from the Allée in new concrete storm pipe. New concrete structures were installed to support new stone masonry structures associated with the storm water mitigation and rehabilitation of the stone hardscape. New stone walls & steps were constructed in limited locations while new Crab Orchard flagstone was installed throughout the Allée. Rehabilitation also involved substantial masonry restoration of all masonry hardscape walls including masonry cleaning, tuckpointing, stone replacement & reconstruction of select wall sections. Finally, extensive landscape improvements included new reconditioned soil, new turf & plantings & a new irrigation system.
