

**FOR IMMEDIATE RELEASE**

March 14, 2022

**Re: Phase # 12 Sanitary Sewer Rehabilitation Project – Warranty Retest**

The Town of Arlington has initiated a program to reduce the amount of groundwater (infiltration) and rainwater (inflow) entering the sewer system. Through this program, sources of Infiltration and Inflow (I/I) will be identified and removed. When these sources are removed, the quantity of flow entering the Arlington sewer system and the risk of sewer backups and overflows will be reduced.

The Town's Contractors, Albanese D&S and National Water Main Cleaning Company will be conducting sewer and drain manhole and pipe inspections as part of the Phase # 12 Sanitary Sewer Rehabilitation – Warranty Retest Project.

Crews will be working between March 18, 2022 and March 25, 2022. The work will be performed Monday through Friday, between 7:00 a.m. and 5:00 p.m. Further notifications will be provided as the work advances.

National Water Main Cleaning Company will be also measuring sewer pipe flow. This work must be performed at night during periods of low sewer flow. Crews will be working between March 22, 2022 and March 24, 2022. The work will be performed Tuesday through Thursday, between 12:00 a.m. and 6:00 a.m. The second day allows for a rain delay in the event of inclement weather. Further notifications will be provided as the work advances.

Persons performing the work will be in clearly marked trucks and will be wearing bright shirts or vests. Work will be conducted primarily within the Town's right-of-way and private residences should not be affected.

The areas included in this project are highlighted on the attached locus map.

Weston & Sampson actively monitors the developing COVID-19 situation and follows guidelines recommended by the State of Massachusetts and Centers for Disease Control (CDC). We will continue to operate safely by implementing health precautions and continue to comply with any local/state/federal mandates that arise. Should we find conditions no longer safe to continue operations or are directed to, we will cease work.

For further information, contact Jamie Craig (Weston & Sampson Engineers) at 978-265-5037.
