A Message from Arlington Health & Human Services Director, Christine Bongiorno RE: COVID-19 Vaccinations Clinics

November 4, 2021

The Arlington Department of Health and Human Services would like to thank all those that registered for a COVID-19 vaccination appointment for their 5-11 year old through the online system this morning. With only 1,175 appointments available and such high demand for the vaccine at this time, all appointments were booked within an hour of being posted online. At this time, the Department is working to receive additional doses of vaccine and hopes to offer additional clinics for children. Once those dates are available, additional links will be posted on the Town of Arlington website, will be sent out through the Town of Arlington social media channels and will be sent out through the public school department and other schools within town. Vaccine appointments are becoming available at pharmacies, local clinics, pediatricians offices and other sites across the state and after this initial rush we will start to see much more availability. We look forward to seeing our vaccination rates in this population increase each week and are thankful to all those that are joining us in this effort to move closer towards a safer 2022.
