Bid 22-39 2022 Lead Water Service Replacement Project - Various Locations

Addendum #1 Contractor Question Responses

1. **Q: Can you please clarify where corporations will be needed? Is it the Town's intention to replace every corporation in the street? Or will corporations only be replaced when needed ?**

A: New corporation stops will be required at all services that are deemed "Full Replacement", i.e. from the water main to the connection at the water meter on private property. All other services shall connect to the existing corporation stop using an adapter unless the Town deems that the corporation stop is damaged and requires replacement.

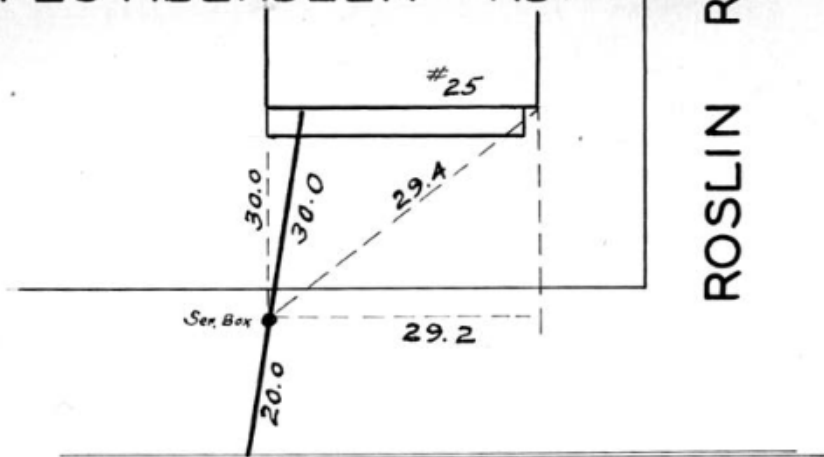

2. **Q: Could you please provide any tie cards for the houses that will be replaced to the meter on this project?**

A: The requested tie cards have been compiled and are included on the following pages of this addendum.

3. **Q: If there are finished basements, how will the contractor be compensated for this? Would the Town consider putting in a property restoration item?**

A: It is the expectation of the Town that Property Owners will provide adequate unobstructed access to the location where the water service enters the building, to the water meter, and to any piping, fittings, and/or appurtenances that may be present in between these points. Should finished basements be present, the Property Owner shall arrange to have any work necessary to provide such access completed prior to the work of the Contractor. It is expected that the Contractor shall minimize disturbance to the basement/interior work area to the greatest extent possible during the water service construction and that they shall restore the area to at least the condition in which it was found at the start of the Contractor's work.
