

## Hills Hill Tree inventory completed by the Davey Resource Group.

### Quick Legend For Maps on Following Pages

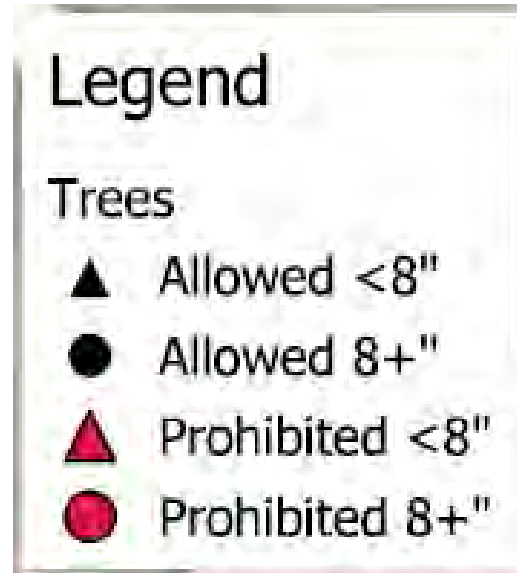

Allowed = native trees not on the DCR's prohibited species list. All native trees are depicted in black with a white outline.

Prohibited = non-native and/or invasive trees which are currently on the DCR's prohibited species list (meaning their sale/distribution are regulated in Massachusetts - we used this list to determine what trees could be considered "invasive"). All invasive trees are depicted in red with a black outline.

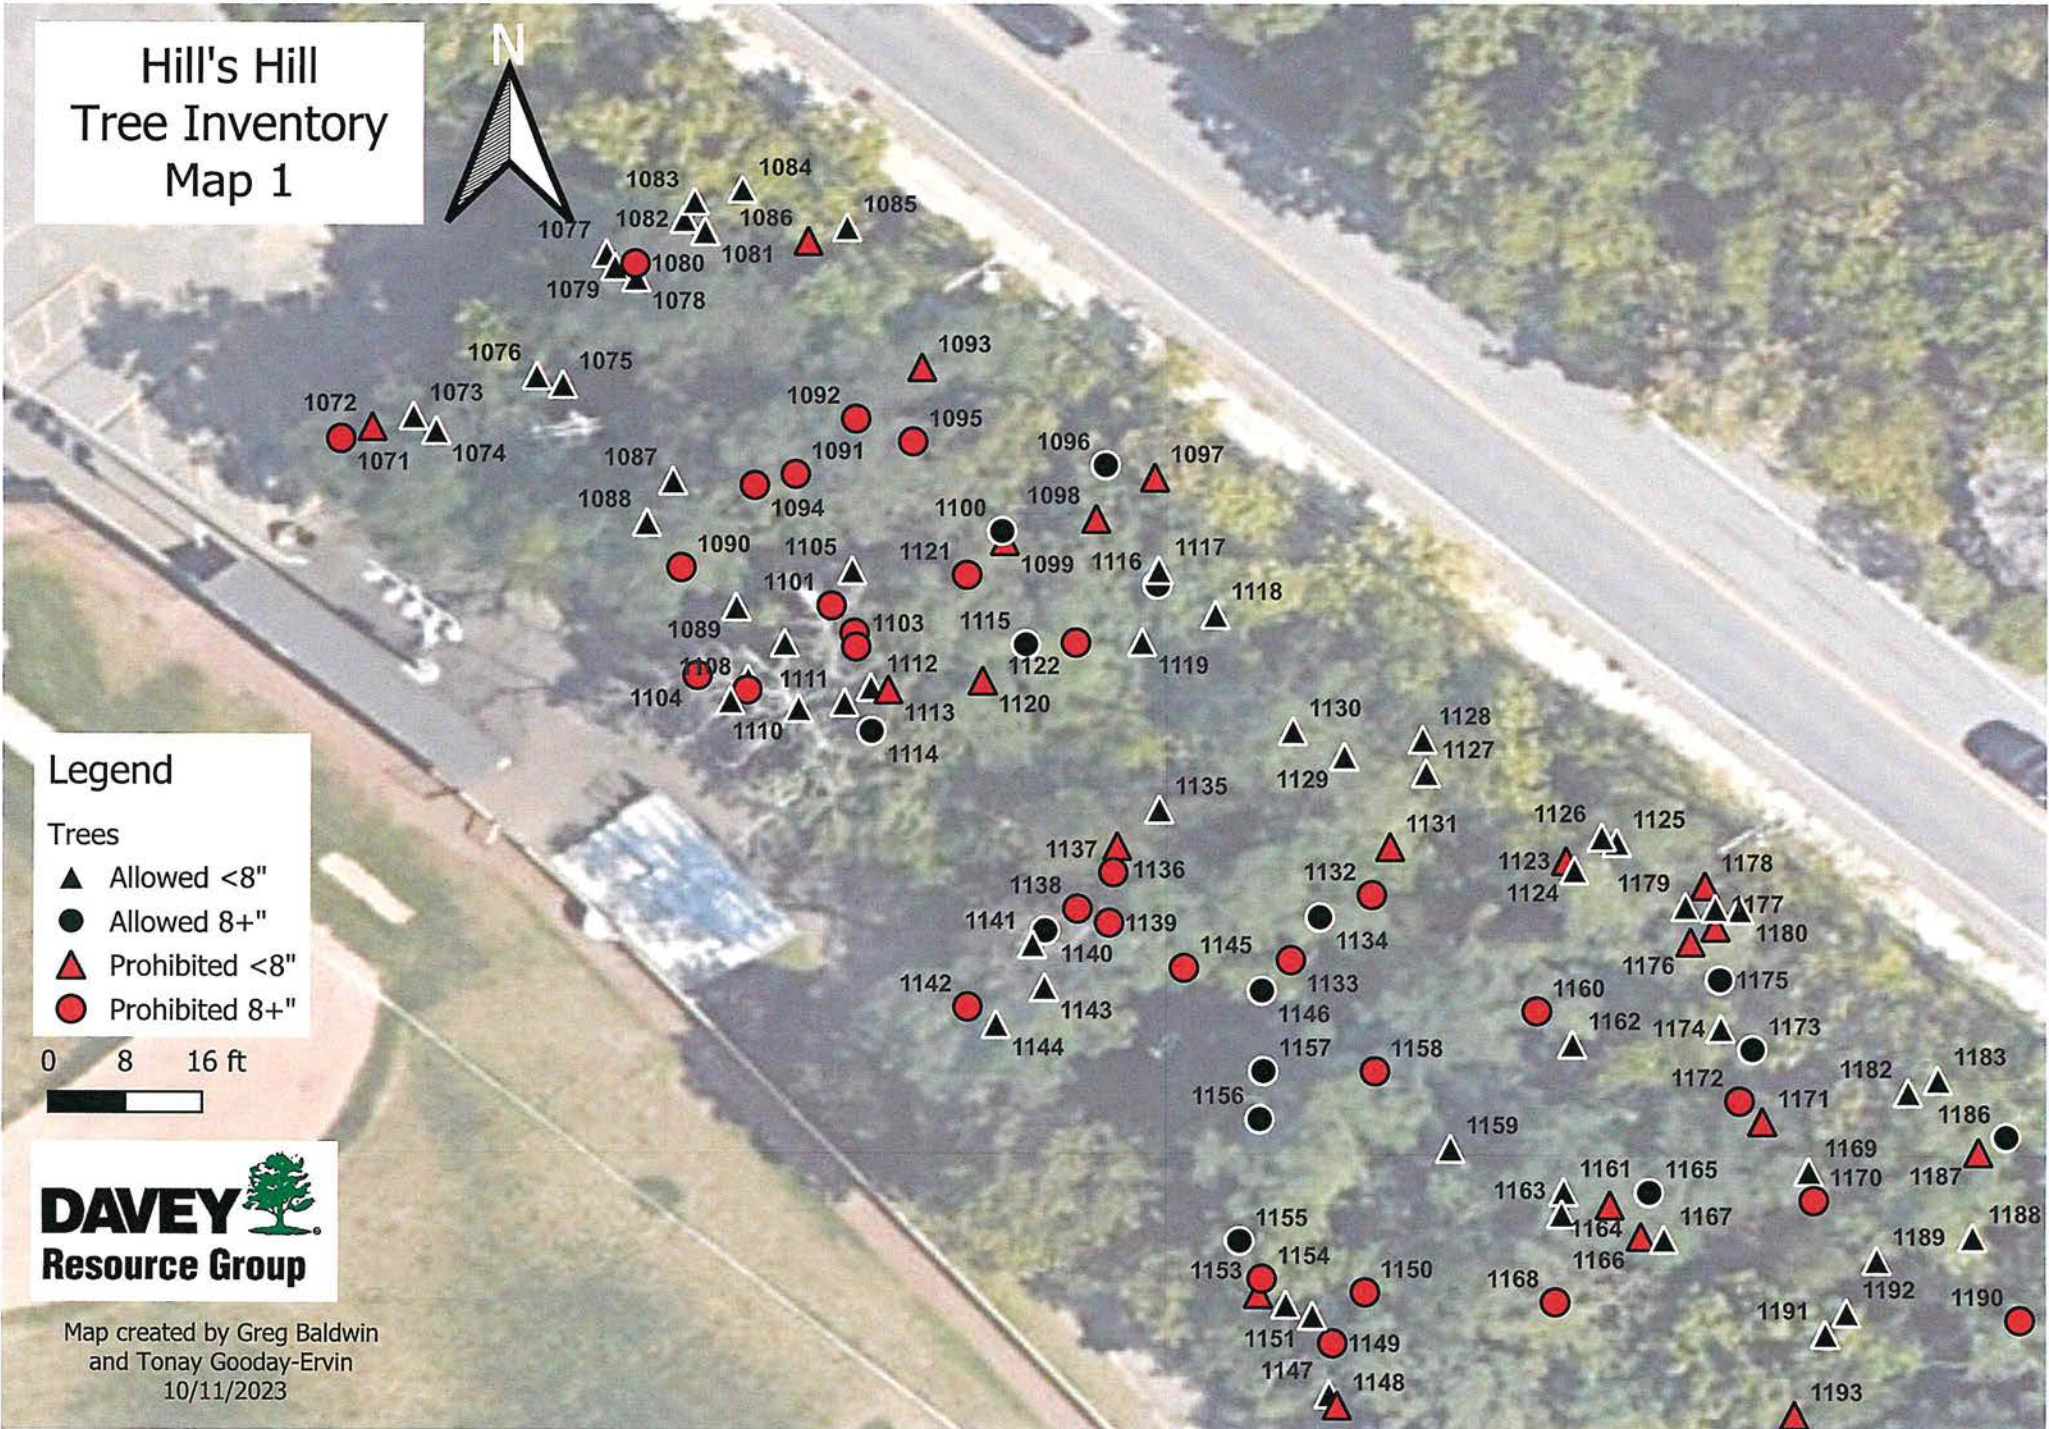

<8" = smaller than 8" DBH. We broke these down to help distinguish between trees that will require significant effort to maintain or remove and those which should be easier due to their size. All trees smaller than 8" DBH are depicted with a triangle.

8+ " = trees which measured 8" DBH or larger. They are represented by a circle.

Thus, a red triangle would mean an invasive tree smaller than 8" DBH, while a black circle would mean a native tree larger than 8" DBH.
