

Monitoring Well Diagram

- Monitoring wells ALT-1 and ALT-2 drilled to 10 feet below ground surface
- Five feet of PVC 0.010 slot monitoring well screen installed from 5 to 10 feet below ground surface with solid PVC to grade with sand filter pack to 2 feet above screen.
- Sealed with cement and capped with protective box.
- HOBO™ pressure transducers installed in both wells to measure water levels every 30 minutes.
- Transducers calibrated to the measured ground water level at the time of installation
