# Summary

- Passing this amendment would avoid spending \$450k on the Foot of the Rocks project
- This money could be spent on affordable housing, open space, and historical preservation projects at the discretion of the CPAC next year
- Since this project won't be complete for the 250th anniversary, it would be prudent to at least wait until after the Appleton Corridor safety improvements and reconsider the best approach for remembering and educating about Arlington's part in the fighting at the start of the revolution
